

METHOD OF IDENTIFYING INHIBITORS OF TIE-2
ABSTRACT OF THE DISCLOSURE

5 The present invention relates to polypeptides which comprise the ligand binding
domain of Tie-2, crystalline forms of these polypeptides and the use of these crystalline
forms to determine the three dimensional structure of the catalytic domain of Tie-2. The
invention also relates to the use of the three dimensional structure of the Tie-2 catalytic
domain both alone, or in complex with inhibitors, in methods of designing and/or
10 identifying potential inhibitors of Tie-2 activity, for example, compounds which inhibit
the binding of a native substrate to the Tie-2 catalytic domain.
